CAREER SUMMARY

- Executive Technology & Operations Leader with 20+ years of experience and proven background in complex operations/distribution environments using data analytics, ERP systems, and data transformation to achieve significant profit increases, risk reduction, and successful organizational growth
- Strategic leadership of extensive IT portfolio, IT staff, ERP systems, M&A assess/integrate, and operational improvement projects for a \$450M company in an FDA-regulated environment with over 700 employees across 12 production, distribution, and retail sites
- Eradicated massive waste, developed KPI data analytics, built actionable business intelligence reporting, and designed process reengineering and custom ERP system advancements, resulting in \$85K of recurring monthly savings
- Built comprehensive Business Intelligence & Data Analytics global platform to analyze near real-time SAP ERP, WMS, & Salesforce.com data with actionable KPIs in areas including Demand Planning, Inventory, Sales, and Accounts Receivable
- Constructed an e-commerce enterprise system, allowing smooth transactions of B2B web & EDI wholesale, and B2C retail ordering, handling \$100M+ of company's revenue
- Directed security initiatives, including multi-factor authentication (MFA), advanced threat protection, vulnerability assessments, compliance strategies, cloud and application security, SIEM, security awareness, and multi-layer data security systems
- Re-designed and re-implemented Salesforce.com for worldwide Sales teams to track sales opportunities providing more visibility, accountability, and ultimately more revenue through higher close/win rates
- Developed a Disaster Recovery & Business Continuity strategy, substantially reducing ERP system recovery time from 2 hours to 10 minutes alongside a critical data loss window reduction from 4 hours to only 15 minutes
- Responsible for integrating infrastructure, security, and ITIL-compliant IT service for 30 diverse clients spanning 45 locations, supporting 2K+ end-users and 250 servers, and achieving 20+ successful IT audits within Sarbanes-Oxley, PCI, and HIPAA environments

PROFESSIONAL WORK EXPERIENCE

CHIEF INFORMATION OFFICER & VP, OPERATIONS AMERICAS | PRINTRONIX 2023 – Present CHIEF INFORMATION OFFICER | PRINTRONIX 2021 – 2023

- Serve as integral member of executive leadership responsible for managing global IT systems, teams, and budgets spanning 6 countries, developing strategy, and leading projects needed to modernize aging IT infrastructure, security, business intelligence, SAP ERP, Salesforce CRM, EDI, and e-commerce systems including in-house & 3PL warehouses, multi-language, and multi-currency
- Currently also serving as VP of Operations - Americas with additional responsibilities leading operations team and managing 3PL warehouse operations during a significant organizational transition that has included layoffs and the loss of the CEO
- Led successful transition to new 3PL warehouse including physical move, system setup, and new process definitions. Renegotiated and implemented improved freight rates & processes for both parcel & LTL logistics.
- Leveraged expertise to restructure and mentor the team, ensuring understanding of organizational procedures and expectations, building a top-performing team and foundation, and providing IT support to increase organizational employee productivity
- Led impactful initiatives such as building sophisticated Inventory Analysis and Demand Planning tools to reduce inventory levels, Sales Analysis tools to replace error-prone Excel-based reports and ensure complete sales visibility in real-time with actionable data, and accounting analytics to reduce accounts receivables and increase cash flow
- Introduced significant security initiatives, including implementing a global multi-layer security strategy including web filtering, endpoint protection, security training and awareness, vulnerability scans, phishing protection, incident response plans, secure password management, and two-factor authentication
- Oversaw the implementation and streamlining of the SAP ERP processes to increase forecasting accuracy, reduced purchasing, and improved EDI integration.

KENT SCHUMANN - CONTINUED

- Re-designed and re-implemented Salesforce.com for worldwide Sales teams to track sales opportunities providing more visibility, accountability, and ultimately more revenue through higher close/win rates
- Streamlined e-commerce integration processes and error handling to enhance the end-user experience, increase “perfect order” rates, and reduce sales operations costs and workload

VP, IT MANAGED SERVICES | MANAGEDLAB SERVICES

2020 – 2021

- Serving as CIO to multiple organizations and directly managing a team of System Engineers & Support Technicians for an expanding Lab Services company, accountable for profitability and scalability growth within IT Managed Services while ensuring security of cloud systems, data centers, servers, and end-users in Life Sciences, BioTech, & Hospitality, leading all IT strategies and initiatives
- Directed security initiatives including multi-factor authentication (MFA), advanced threat protection, vulnerability assessments, compliance strategies, cloud & application security, SIEM, security awareness, and multi-layer data security systems
- Streamlined operational workflow and aligned Service Desk processing with enhanced ITIL service processes to maximize capability and capacity, enabling accelerated ticket handling and allowing consolidation of 10% in Service Desk staffing while maintaining operational efficiency and customer satisfaction rates despite an increasing workload
- Overcame multiple obstacles brought on by the COVID-19 pandemic, including implementing cost-effective and synergetic remote working solutions, internal file server migrations into SharePoint, full Microsoft Team Voice PBX system integrations, and timely conversions of 400+ personnel to secure cloud operations

CHIEF INFORMATION OFFICER | SANTA MONICA SEAFOOD

2008 – 2019

- Recruited as 1st CIO, growing, managing, and mentoring the IT Infrastructure, Application Development, & Business Analysis teams, with additional responsibility for continuous improvement projects aiding revenue growth of \$100M to \$450M+
- Spearheaded all ERP & POS system upgrades and customization company-wide including new acquisitions, supporting 700+ employees across 12 production facilities, distribution centers, and retail sites
- Eradicated massive waste, developed KPI analytics, and facilitated business intelligence reporting to leadership for actionable insight, in addition to process reengineering and custom ERP system advancements, resulting in \$85K of recurring monthly savings
- Developed a Disaster Recovery & Business Continuity strategy, substantially reducing ERP system recovery time from 2 hours to 10 minutes alongside a critical data loss window reduction from 4 hours to only 15 minutes
- Built proprietary application, workflow, and reporting solution for streamlining Purchase Order Adjustment processing, decreasing monthly expenditures by \$50K
- Developed comprehensive Procurement solution to decrease waste and product substitutions while strengthening ERP system supply chain functionality, yielding infrequent returns, boosting customer satisfaction rates, and monthly savings of \$12K
- Constructed an e-commerce enterprise system, allowing smooth transactions of B2B web & EDI wholesale, and customer preferred B2C retail ordering, handling \$100M+ of company's revenue while simultaneously eliminating manual errors
- Spearheaded in-house Agile application development with an MVP focus, utilizing IIS/ASP/MS SQL Server stack, T/SQL, C#, Javascript, Kendo UI, SSRS, and PowerBI reporting and analytics to amplify ERP, CRM, and WMS versatility
- Engineered comprehensive Returns & Credit Memo solution, utilizing root cause analysis to identify trends, enabling accounting to pinpoint issues, saving \$10K+ a month

CO-FOUNDER & OWNER | SLINGSTONE INFORMATION TECHNOLOGY, LLC

2004 – 2018

- Co-founded and successfully sold organization providing world-class IT service for mid-sized companies, integrating infrastructure, security, and ITIL-compliant IT service for 30 diverse business clients across 45 locations, supporting 2K+ end-users and 250 servers - achieving 20+ successful IT audits within Sarbanes-Oxley, PCI, and HIPAA environments
